

JCIA Runway Meeting October 5, 2017

Please join the Port as we take input and answer questions from airport users regarding the need for and timing of the runway rehabilitation project at Jefferson County International Airport.

The Washington State Department of Transportation (WSDOT) Aviation Division, Federal Aviation Administration (FAA), Reid Middleton Engineers, and the Aircraft Owners and Pilots Association will present information on the methodology for airport pavement condition assessments and rehabilitation processes for airports in Washington (including JCIA), as well as the grant funding process.

The meeting will include time for airport users to discuss concerns and provide suggestions to minimize impacts from future runway rehabilitation work.

Meeting Details

Thursday, October 5, 2017

3:00 p.m. – 5:00 p.m.

Tailspin Tommy's

300 Airport Road | Port Townsend
