Hello to all,

Thank you for bringing attention to the orphan waste abuse problems observed at the Boat Haven Marina environmental centers. As tenants here over the past 7 years we have personally witnessed and experienced the inconvenience and sanitation hazard risk overflowing bins present. It is unacceptable for people to abuse these facilities by bringing their land trash to the Marina.

We understand that this very problem is responsible for the threat of the November 1st closure of our environmental centers of which we are greatly disappointed to learn about.

The recent upgrades that were made to improve these facilities with fresh paint, newly installed rooves and surveillance cameras is greatly appreciated and no doubt very costly. This improvement effort and expense should not be wasted on bad actors abusing these facilities.

As two adult liveaboards we generate approximately 2 gallons of trash daily.

Our suggestion is to eliminate code access and issue "dock specific FOB access only," for tenants. This could be implemented as a trial experiment for trash intake monitoring purposes as mentioned in The Peninsula Daily News article published Tuesday, October 6, 2026.

This may be a more reasonable and acceptable solution for this issue?

Many thanks for all your efforts in maintaining our friendly and happy Marina environment.

Our very best regards,

Ken and Gail kleinhoff

Hi Eron,

I am a little concerned about the new trash disposal system that is being implemented on November 1st.

It seems like the handful of live aboards that you have on A,B, C, D docs could not be possibly generating a large amount of trash. As a matter of fact, on our boat, most of our usage of the environmental centers is for our recyclables, as we only generate an 8 gallon bag of trash once or twice a week.

I believe that most of the trash is generated by transient boaters, non-liver boards who rent slips out and bring their trash from their homes to the port for disposal, and fishermen.

It would be nice if all the "true live aboards" could have a key fob for trash removal whenever we need to instead of the limited time that it will be available. I also would highly recommend keeping the recycle bins https://linkprotect.cudasvc.com/url?a=https%3a%2f%2favailable%e2%80%a6.as&c=E.1.ENIMHg6IUy0-t_-pmcHXUQKVZbl-FXwzmL7mH-9YfUtkQvvZnC2N0WvH99wuZXtaBFSP3seh6vYAFekMkOr0b2FcZyWglPC8CaW1u_1q7OgvcQR3uM.&typo=1 without those there will be an enormous amount of trash generated. And that would be a real shame.

Also, putting a trashcan at the end of each pier will generate a problem of people dumping their trash in those trash cans, followed by birds and animals getting into the trash and making the port look awful. Not to mention the health hazard this will cause.

Thank you for your time and consideration, Lynne Cassella-Blackburn
