2024 Capital Budget project description
3rd draft, presented 10/24/2023

Should be on page 59 of the Commission packet.

Quilcene Campground

This project will restore the RV campground in the upland area above the Herb Beck Marina. The campsites will include utility connections (water, septic, power) and will implement low-impact development techniques such as gravel surfacing instead of asphalt pavement at each campsite. The project is estimated to cost \$200,000 and will be funded with NOI.
