Notice: Construction of New Taxiway Set to Begin October 16, 2023

Construction of the second connector taxiway, including infield grading at select locations and stormwater improvements between the Parallel Taxiway A and Runway 9-27 will begin, weather permitting, on Monday, October 16, 2023. The estimated construction completion date is November 17, 2023.

The first project phase includes construction during the day and will take several weeks to complete. The daytime work hours are 7 AM to 7 PM, Monday through Friday. During the first phase, the runway will be open, while a segment of the parallel taxiway A will be closed. Aircraft must follow the detour route using the hangar taxilanes 1 and 2 around the work zone. The detour will remain in place during the project's duration whenever the runway is open.

The second construction phase includes construction during the night. The night-time work hours are 7 PM to 7 AM, Monday night through Saturday morning. Runway 9-27 and the parallel taxiway A will be closed during these hours and reopened during the day. The second phase will last about three weeks. The third phase includes construction during the day (7 AM and 7 PM) and will last several days. The runway and the parallel taxiway will be closed during the daytime work hours and reopened at night.

The detour route using hangar taxilanes 1 and 2 is included for informational purposes.

Please contact Matt Klontz at the Port of Port Townsend at 360 385-0656 with any questions.
