To Mr. Berg and Port commissioners,

I've been a member of the Boat Haven community for several years. I contribute to the local economy in many ways. Including creating jobs and helping to maintain our facility as a working Port. This new trash policy is going to create a slew of new problems that will make this place look like a slum. I fully disagree with its implementation as it will increase the trash all over this entire neighborhood. I already spend lots of time pulling trash out of places that are technically Port property on my own time, that was neglected and fallen through the cracks so to speak. I pull trash of the beach that blew out of the Port on a daily basis. This policy will only make the local environment more polluted from boat yard trash. Please DO NOT implement this policy. It's not a good one. And it's only going to make life harder and more dangerous for the local environment and people who live and work here.
Instead of putting the squeeze on your local neighborhood for basic facility amenities like trash collection. Please, consider other options and other opinions from people who live and work here.

Sincerely,

Tom Billingsley
